

Share what you think about care

The government is **reviewing** adult social care. **Reviewing** means looking at:

- how adult social care can be better
- what changes the government can make to make care better

This review is called the big conversation on care.

The government wants to hear what you think if:

- you get adult social care
- someone you know gets adult social care
- you don't use adult social care now

There is a new website where you can:

- share your ideas about adult social care
- vote for other people's ideas about adult social care

You need to tell the government what you think before November 2026.

Go to this website to tell the government what you think:
